

***Digital Oil and Gas*** is a weekly podcast series that explores the topic of digital innovation and its impact on the global oil and gas industry. The show communicates relevant developments, provides insight and analysis, and explores more deeply the nuances of digital technologies. Its intended audience includes industry and technology professionals and leaders.

The podcast was launched in mid 2017, and has since published over 125 episodes to market leading podcast services including iTunes, Spotify, Stitcher, YouTube and iHeartRadio. The show is favourable to the industry, meets the standards for family listening, and is independently produced without advertising or financial support. The producer is Geoffrey Cann, an oil and gas digital strategy specialist with a 30 year career spanning the globe and most aspects of the industry.

Episodes vary between 10 and 20 minutes in length, in three broad formats—interviews with industry leaders, Geoffrey’s lectures recorded at various public presentations, and recordings of Geoffrey’s weekly article series on digital innovation in oil and gas. Prior topics include the transformation of fuel retailing, the role of artificial intelligence, the future of work, and the rise of blockchain.

The podcast is emailed directly to the 600+ subscribers to Geoffrey’s blog (available at <https://geoffreycann.com/blog/>) and each episode is downloaded at least 350 times in the week it is released. Geoffrey promotes each podcast episode four times in the year it was recorded, on a range of social platforms, including Facebook, LinkedIn and Twitter, with a combined audience of ~5000. The show is frequently highlighted in energy industry newsletters such as EnergyNow.

The podcast series is a platform to showcase digital innovators, their successes and their lessons learned to a global audience. Interviewees have benefitted from the podcast by elevating their brand, attracting talent, building their communities and accessing new business opportunities.

Recordings are made at the mutual convenience of the interviewer and interviewee, either in person in a quiet meeting room at the interviewee’s location, or virtually using on-line meeting software (Zoom, Google Hangouts, etc.), and generally take 1-2 hours of

time to set up and complete. All recording equipment, software and production technologies are provided at no cost by the interviewer.

The topic and interview questions are agreed in advance and avoid commercially sensitive areas such as pricing, future plans or financial outcomes, so as to protect the rights of shareholders and owners. Interviewees are not compensated for their participation, and do not have rights to the recordings. However, before any episode is released, interviewees are offered an opportunity to listen to the recording and to approve it for release. Interviewees are free to promote the podcast and distribute copies of the episode as they wish. Interviewees may also request that their podcast episode be removed from distribution at any time.

If you are interested in being interviewed for the podcast, simply contact Geoffrey at your convenience.
